## PERSONAL PROFILE

---

Senior Fullstack Javascript Developer and aspiring learning machine. I am used to working independently in a fast-paced, changing environment and take pride in writing quality code that delivers value to its users. My journey to balance short-term business goals against long-term developer speed have made me a fervent believer in Agile, Test Driven Development, and improving Developer Experience. I am looking to continue growing, both as a person and as a developer, and open to new challenges and projects. So do not hesitate to get in touch! ;)

Fun fact? This CV was made with Latex; check my “LatexCV” repository on github.

## WORK EXPERIENCE

---

### Backend Lead, *Cyferd*, Remote, Spain

*Aug 2021-Now*

- Led a 5-person team that took a highly decoupled microservice architecture from proof-of-concept to production-ready platform
- Worked across all backend (storage logic, microservice orchestration, 3rd parties integrations, etc) and implemented from scratch the platform’s multi-tenant authentication.
- Worked with the team through two migrations: NATS Streaming to Kafka and from Neo4j to PostgreSQL.
- Conceived, developed, and ultimately owned several projects to improve developer speed: CI and CD pipelines, styling and formatting enforcers, tools to easily deploy the platform locally, and a devcontainer with the development environment.
- Learned and promoted agile good practices like smaller prs with incremental improvements, the up-front discovery of acceptance criteria, test-driven-development and automated testing, etc.
- Established a tradition of fortnightly training calls, where each time a different member of the wider developer team will present to the rest on a topic of their choice, with the double goal of giving the host the opportunity to practice public speaking and spreading knowledge across the team.

### Senior Frontend Developer, *Cyferd*, Remote, Spain

*Apr 2021-Aug 2021*

- Early employee in a low-code/no-code startup with a product capable of implementing any type of form-based app
- Worked on the front-end’s view engine, simplifying its code and adding the ability to react to user input (clicks, text inputs, etc)

### Fullstack Javascript Developer, *Gloval (Avansis)*, Remote, Spain

*Nov 2020-Apr 2021*

- Worked remotely as a consultant for Gloval renovating its software infrastructure with Javascript technologies.
- Developed microservice and microfrontend applications with Reactjs, Express, GraphQL, MongoDB, Postgres and Docker.
- Worked in a SCRUM environment and contributed practices like the walking skeleton to improve agility.
- Led the implementation of several projects and good practices to improve code quality and developer speed.

### Fullstack Javascript Developer, *Self-employed*, Remote, Spain

*Aug 2016-Now*

- Developed Single Page Apps, Backend Servers and Conversational Interfaces and Mobile Applications.

### Fullstack Javascript Developer, *Linkproved*, Remote, Spain

*Dec 2018-Jan 2020*

- Maintained the main site working with Reactjs, Express and MongoDB.

**NextGame Sport Cofounder**, *NextGame Sport*, Manchester, U.K.

*May 2016-Sept 2016*

- Co-founded an sport-predictions startup accepted into the Entrepreneurial Spark accelerator that sought to connect fans and brands together.

**Software Engineer Intern**, *Microsoft*, Dublin, Ireland

*Jul 2014-Jul 2015*

- Created C# desktop applications and cloud components to automate the localization process of Office content.

**York Interdisciplinary Research Student**, *University of York*, York, U.K.

*Jul 2013-Sept 2013*

- Developed a multithreaded Java GUI to teach Evolutionary Computation.

## EDUCATION

---

**BSc (Hons) Computer Science with Business and Management**

*Sept 2012 - Jun 2016*

*University of Manchester*, Manchester, U.K.

1<sup>st</sup> class honours

- Worked in several team projects and won the 2014 IBM Software Engineer price for the best team of the year.

**Baccalaureate in Technology**

*Sept 2010 - Jun 2012*

*I.E.S. Gregorio Marañón*, Madrid, Spain

9.76/10 (first of cohort)

- Tackled university-level problems in the “Campus Científicos de Verano” program.

## TECHNICAL SKILLS

---

**Programming Languages:** Typescript, Javascript, HTML, CSS, Bash/Zsh (command line), Python, etc.

**Frontend:** React, Webpack, ESLint, Redux, Material-UI, ApolloClient, Prettier, Angular, etc.

**Backend:** Express, Node, REST, GraphQL, Docker, Mongo, Postgres, Oracle, Swagger, etc.

**Other tooling:** VS Code, Git, Automated testing, Agile, Cloud deployment, Heroku, Azure, etc.

**Human languages:** English (*fluent*), Spanish (*fluent*), French (*intermediate*), Japanese (*beginner*).

## VOLUNTARY EXPERIENCE

---

**Mathematics teacher**, *Junior Achievement Ireland*, Dublin, Ireland

*May 2015*

- Taught mathematics and its applications to elementary school students using games.

**Committee member**, *Ultimate Programming Society*, Manchester, U.K.

*December 2013-Jul 2014*

- Organized events to bring the latest technologies and development trends to the students of school.

**PASS Leader**, *University of Manchester*, Manchester, U.K.

*Sept 2013-Jul 2014*

- Facilitated the learning and integration into university life of 1<sup>st</sup> year students.

## OTHER NOTABLE POSITIONS

---

**Toastmaster member:** regularly practicing public speaking and leadership skills.

**Venture Out 2015 finalist:** ended finalist in the business idea competition.

**IMAV 2014 participant:** created a 7-digit number recognition program.
